Dehu Road, Pune | +91 8459054316 | tejasrepale13@gmail.com | github.com/trpencyber | linkedin.com/in/tejas-repale-3239543a5

PROFESSIONAL SUMMARY

Aspiring Java Backend Developer (M.Sc. in Computer Applications) with hands-on experience designing and delivering production-style architectures using Spring Boot, Spring Cloud, Spring AI, Spring Security (JWT), Redis, PostgreSQL, and Docker. Brings a security-first mindset from a B.Sc. in Cyber Security and 4 months of industrial training in full-stack Java development. Adept at leveraging modern AI development accelerators to architect scalable enterprise services. Seeking an entry-level Software Developer / Java Developer role.

TECHNICAL SKILLS

Languages:	Core Java, JavaScript (ES6+), SQL
Frameworks & Cloud:	Spring Boot 3, Spring Cloud (Eureka, API Gateway), Spring AI, Spring Security, Spring MVC, Spring Data JPA, Hibernate, JDBC, Maven
Web Technologies:	HTML5, CSS3, JSON, AJAX, Responsive Web Design
Databases & Caching:	PostgreSQL, MySQL, Redis (Distributed Caching, Cache-Aside)
DevOps & Tools:	Docker, Docker Compose, Git, GitHub, Postman, IntelliJ IDEA, VS Code, STS / Eclipse
Core Concepts:	OOP, JWT Authentication, Microservices, Collections, Multithreading, Exception Handling, Data Structures
AI-Assisted Dev:	Claude, Google Antigravity, Gemini, GitHub Copilot (leveraged as architecture & development accelerators)

PROJECTS

Hospital Management Microservices Platform

Enterprise Architecture & AI Triage

Java 17 · Spring Boot 3 · Spring Cloud (Eureka, Gateway) · Spring AI · Spring Security 6 (JJWT) · Redis · PostgreSQL · Docker Compose

- Conceptualized and directed a healthcare microservices architecture featuring Netflix Eureka Service Registry, Spring Cloud Gateway with HMAC-SHA256 JWT validation, and domain services (Auth, Doctor, Patient).
- Integrated Spring AI in patient-service for an automated Clinical Symptom Triage Engine: analyzes symptoms, categorizes urgency (Emergency to Low), prescribes precautions, and queries doctor-service via @LoadBalanced RestTemplate.
- Implemented resilient distributed Redis caching (@Cacheable, @CacheEvict) with a zero-crash CacheErrorHandler fallback to PostgreSQL and distributed booking slot locking.
- Containerized 7 services via Docker Compose with lightweight Alpine JRE images; verified with automated PowerShell & JUnit 5 test suites.
- Safely leveraged AI accelerators (Google Antigravity, Claude) to accelerate microservice scaffolding and test suites while steering core design.

Rexmart — Full-Stack E-Commerce Application

github.com/trpencyber/Rexmart-Ecommerce-website

Java · Spring Boot · Spring Security · JWT · Redis · PostgreSQL · Docker · HTML · CSS · JavaScript · Maven

- Developed a full-stack e-commerce platform with Spring Boot REST APIs, featuring a customer portal and a secure admin dashboard.
- Configured a stateless JWT security filter chain using Spring Security, protecting cart and checkout endpoints while allowing catalog browsing.
- Implemented a cache-aside caching strategy using Redis, with a ConcurrentHashMap fallback, to reduce repeated catalog database queries.
- Orchestrated the application, PostgreSQL, and Redis cache as Docker containers using Docker Compose for reproducible deployments.

TRAINING & CERTIFICATIONS

Java Full Stack Development — JSpiders, Wakad, Pune

Certificate Awarded

Full Stack Java Developer Course

Full Stack Web Development with Spring Boot — Academy of Skill Development, Pune

4-Month Industrial Training

Primary Project: Rexmart E-Commerce Application

EDUCATION

M.Sc. in Computer Applications — Pratibha College of Commerce & Computer Studies, Pune

2024 – 2026 (Completed)

B.Sc. in Cyber Security — Indira College of Commerce and Science, Pune

2020 – 2023
